

## **Star Codes™**

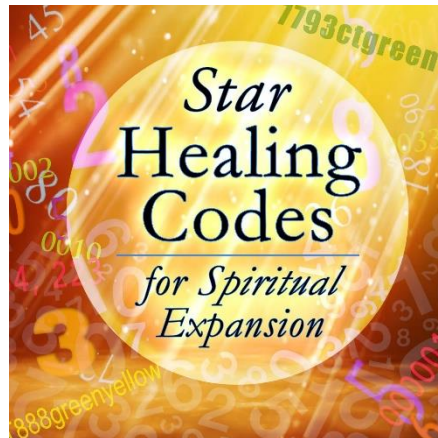

Channeled to Kelly Hampton by Archangel Michael  
to use in conjunction with Star Healing Intergalactic Energy™ or alone.

Transcribed at Mt. Shasta, Ca.

Next retreat is June 2019

### **Harmonic Healing Codes for Spiritual Expansion/Part 1**

**Healing codes to Connect with:**

**Jupiter**

**the Great Central Sun**

**Saturn**

**Nebulon**

**God/Creator**

#### **Healing codes**

“You may state that some individuals will benefit from healing codes alone and others will need a direct connection to Source, which you are and involve them in Star Healing 2.”—Archangel Michael

**What are harmonic healing codes?**

“For those of you who are new to harmonic codes, they are a powerful yet simple way for every man, woman and child to exercise your living breathing right to heal. Codes are a way to heal. It’s that simple. Harmonic codes may be numbers, they may be complex sacred geometric forms, they may be color, and harmonic codes can also be toning or sound codes. Everything is highly charged. It is charged not only from the vessel that is providing the information to you (Kelly); it is charged from the numbers themselves; it is charged by the sources; it is charged by many different things. For those of you who have not done any type of energy work, we ourselves feel it would be best to try one number series a day, For example, see if you feel any effects yourself. Be moderate. It may seem simple, or you may even be disbelieving of the information presented here. You may feel as though you can certainly do these codes multiple times—the more is better sort of thinking. But we are asking you not to do this. We are asking you to think about, as we say, one code a day, or one code a week, or one code a month as it moves you. But the point is not multiple codes in one day. Is this clear? Not that anything can harm you, but there are reasons behind everything that is infinite wisdom, and we would rather make sure that there is integration within your energy fields of what is being presented here.” --Archangel Michael

### **Jupiter: 6, 5, 4, 3, 2, 1, 0**

“The first number: 6, 5, 4, 3, 2, 1, 0. Is this a pneumatic code, a key code or something else? It is a frequency, a harmonic code that coincides with the frequency of Jupiter’s Energy. Jupiter is largely responsible for the frequency that is affecting your planet. More particularly, we call it harmonic convergence, the frequency that this number responds to. Why is it important for universal knowledge? It is going to be helpful to know what this number sequence is for those that are awakening themselves. Because the use of this number series will enable each and every one of you that are listening to this information to provide yourselves direct portal access to the frequencies of Jupiter. Why is this useful? We say the frequencies that come from the planetary system known in the constellation as Jupiter emits a high ray (let’s call it a ray) actually a pink ray. Many of you may have heard of other rays coming to your planet, yellow, purple, green, and blue and so on. Perhaps later we will have time to talk about rays and the powers of rays. But to keep all of this on track here we would say that this

particular series is a code, not a key code, but a harmonic code. Harmonic codes generally can involve number sequencing, but they don't have to. Harmonics can also include vibrations of things and how they are arranged. But for simplicity as an introduction for the work we are doing, we will start with the key coding as we say in a numeric fashion. The numbers that were transcribed in a descending order are: **6, 5, 4, 3, 2, 1, 0**. They will connect those through the portals of light to the resonance of Jupiter. The frequency of Jupiter is largely interdimensional in nature. What that means is that once you connect to the portal of Jupiter... It's sort of like; let's say once you reach the destination of London, England, or a continent or a city, it expands to the whole continent. The portal of Jupiter's resonance is becoming more important to your planetary ascension. We want those who are awakening to go there. We want them to have the ability to go there in a way if they don't have the mental telescoping abilities presented in their awareness right now. They could go there by the writing and inscribing of the numbers. **This is the number series for accessing the portal of Jupiter's energy. Jupiter is in a pivotal point in the planetary cosmic ascension so going and accessing it is like opening another door. When you go there you will be opening another door, walking through that portal to access the heart centered energies of ascension in all directions. Very much like (angels have given symbols before) a pebble in a lake and the rings go out in concentric fashion.**

### **Saturn: 8, 7, 6, 5, 4, 3**

The purpose of using harmonic codes is to allow those who are doing light work, and not hearing it, not seeing it, not having a knowingness, by using the numeric systems will allow them to access other dimensional frequencies for the purpose of elevating the planet (or themselves).

This code is the harmonic code for **Saturn**. When we open these portals by the writing or inscribing of these numbers, does it transport our energies bodies there? And what is the difference between Jupiter and Saturn now? What you are asking us to explain might be like the difference between a stalactite and a stalagmite. They are all part of the whole but there are differences within them. If someone were to be called upon or just out of a need or desire, knowing that they have light work to do on your planet, curious at the bare minimum, to write this number series down, they would be connecting with the portal of the planetary energies of Saturn. Saturn's energy is very feminine-- Jupiter's not so much. One area of distinction is that Saturn can help you awaken and connect to more of the feminine energies on planet Earth, and not just on planet Earth, but again this is interstellar work.

Let us be clear about this--It is an attempt to connect more of those on the earth plane with those of your star families in other dimensions. It is a way to say hello universally without knowing all the languages that might exist. We are leading up to toning, that is another language. But this is a language in a simpler form. That is why we want to introduce the numbers first, to warm you up, warm everyone up. And everyone can do this. Then just kind of go on up the scale. This is a form of a light worker's light language. It is a code that is going to connect you with other planets outside of your own. This is the code that will connect you with the energy of Saturn. And what is the benefit of this again? You are an interdimensional consciousness, you and everyone always have been. The more you can be freeing yourselves of any depressive energies that still may be present and liberating yourselves to the knowledge of this, the sooner the planet will ascend, and you can say I am taking an active role in the ascension of the planet Earth where I dwell!

### **Nebulon: 8, 6, 8, 9, 5, 4**

It is Nebulon. We tend to be from the Pleiadian system or from Nebulon (Herculan) which is further away than the Pleiades. This is the harmonic code for connecting with Nebulon. **Nebulon** is not very much talked about, not very well-known about. In some circles you might say, a planetary system of wise and loving intelligence. It is many, many thousand light years away from your own. Sort of like the grandfather energy, Jupiter is like the brother, Saturn is like the sister. This energy of Nebulon might be like the grandfather in terms of age and distance away. It helps many connect with the "Wise Ones". Many of the wise ones have their roots in this system. And, we are not just talking about wise souls; we are talking about wise elementals. There are many elementals that just like humans can have their own evolution of being, where they are in their spiritual development, so as the plant and animal kingdoms. Some of the wise ones of the plant kingdom know this to be their home. Let me give you an example, if you were to sit underneath some of the large Redwoods, and write this number, or utter this number, but writing it in the ground of the Mother is more empowering than saying it, unlike affirmation and prayer. The wise ones in any land or country are the tall, ancient overseer elders of the plant kingdom. They exist in every continent on your earth. They will thank you and they will honor you. And those who are aware enough and open enough will hear your answer in a similar coded number. You may not know the meaning of what the number is, but many of you will get to that place of knowingness. All the indigo and rainbow children will. They already can do this very easily, also the crystalline and diamond children. But for all of you elders (he said with a grin and chuckle in his voice) in your own way, these are simple guidelines or tools. You are never too old to learn. You have this information before you now.

Are there more codes? Yes. Everything has infinite expansion. We could go to every star in the sky and tell you it has a code. We could go to every asteroid. Every flower has a numeric code. Every scent has a numeric code. So perhaps at another time, journey, or juncture, but for right now, our mission is to talk about interstellar connectedness and interdimensional work because it is important to the planetary ascension.

## **The Great Central Sun/ the giver of all life, the giver of all that is: 1, 1, 1, 1, 1, 1**

What is the purpose to connect with Jupiter, Saturn, Nebulon (Herculan), the Great Central Sun, and the other code we are presenting here today? It is for the purpose of elevating the planet, connecting your planet more fully, and replacing her back into the center of her being with her other families. It is a mission, a light mission of global proportions, and also personally it can become a personal mission. You yourselves if you choose to do this, should also feel the effects. You might be wondering "I'm going to write down every code. I'm going to go home and I'm going to go out in nature and I'm going to do all five of these codes and connect all at once." There is one word of caution. It may seem like a very simplistic thing that we are describing--writing some numbers down, but they are highly charged. Everything is highly charged. It is charged not only from the vessel that is providing the information to you; it is charged from the numbers themselves; it is charged by the sources; it is charged by many different things. For those of you who have not done any type of energy work, we ourselves feel it would be best to try one number series a day, for example. See if you feel any effects yourself. Be moderate. There is no race to do all at once. It may seem simple, or you may even be disbelieving of the information presented here and you may feel as though you can certainly do these codes multiple times—the more is better sort of thinking. But we are asking you not to do this.

We are asking you to think about, as we say, one code a day, or one code a week, or one code a month as it moves you. But the point is not multiple codes in one day. Is this clear? Not that anything can harm you, but there are reasons behind everything that is infinite wisdom, and we would rather make sure that there is integration within your energy fields of what is being presented here. That is our utmost concern. Our first concern is that whatever is presented is done in a loving and energetically safe and empowering way. It is a bit like, my friends, have you ever sat down to eat a meal and you can make a choice, right? You can make a choice to eat wisely for your vessel, or you can make a choice to eat toxinated foods--that certainly many on your planet are choosing to do. They are making decisions where it is not only toxinated food, but way too much food and

you have sat down and gorged yourselves, overeaten. This would be like the analogy of overeating—sitting down and doing the codes over and over, and over again. So be mindful. That is what we are asking—to be mindful.

Another comment here globally about the Great Central Sun, magnified healing. To encapsulate the importance of any of these—Jupiter, Saturn, Nebulon and the Great Central Sun in a very abbreviated way by no means that there isn't infinite learning in all of them. We ourselves intend to help by infinite expansion upon each of these concepts. We invite you, if you are so drawn, to expand your knowledge about all four of these planetary and infinite God-created sources on your own. In other words, because in the format that we are initially presenting this material, in a more simplified fashion, it doesn't mean any one of you could not spend hours upon hours studying Jupiter in its great beauty and wisdom, and the portals that it can open to interdimensional healing work, and the same said with all the others that were presented.

**God/Creator, Infinite Mind, whatever your name for the holy creator being that first created life: 0, 0, 0, 8, 8, 8 I**

When you go to use these codes, we would prefer you do them as instructed, if not visually clear in your mind, verbally so. There is equal spacing, equal weight, equal intention, with each of the numbers.

***Q: Is there anything about the feminine side of God that you can share with us?***

Well, we can. Do you want us to re-teach some of humanity about what God is and God isn't? We would lovingly do that. The God force has all frequencies within, so they are not separate from, so in answering your question to speak to the feminine energy or the feminine part of God would imply that there is some separateness. In fact, God is total and whole in everything. God is in the rock, God is in the tree, God is in the sky. Mother/father sky, you hear these things. Perhaps you are confusing that, my friend, with Father Sky and Mother Earth. Mother Earth was created and is part of God, Gaia, Goddess, as in everything. So, we see no separateness if we are being helpful in answering your question. All things living and breathing, man, woman, child, androgynous even, is part of God's plan. One other final thing. If you want to draw a line over the top (of the numeric code). Drawing a line over the too. We do want to honor what you are saying though, because there are many on the planet that do honor feminine/male energies and we know of this. It is in fact how your species was created. In

honor of a male God frequency (again there is no separateness,) you could put the line over the top of the numbers. But if you were of a mind thinking, there is no separateness to connect with the female aspect of God, you would put a line underneath the code.

This doesn't mean however, that you need both lines. You could just go with this number code itself. There will be some of you who find what we are saying hard to believe, and you will still want to assign a gender or an energy to a force that has none. There is some very strong energy by the laying of these lines also that falls a little bit outside of what we are calling the number coding. So that is why there was a bit of hesitancy to add them. I can expand it. And now in drawing some other marks off to the side, this would be what we would call Pleiadian work, where you would draw this code and implant it somewhere particular.

Let me just give you one short example. To give you an idea of what an extension of these very simple yet powerful energetic numbers and coding can mean and will evolve to. If I may...the line here, this would connect you to the starship. Which starship? The number first is the God force. If you write the whole symbol down like this, you would be connecting with the lightship. Which lightship? This lightship has already received a signal, an energetic symbol. Like everything is a signal on your planet. Yes, we would say the eagle, the hawk, tall high-soaring condors. And when I said lightship, you are wondering, that's not a lightship, I say it is. They are one and the same. They have been shipped you might say, like an intermediary for some. They have been here since beyond the dawn of time. You see just from the amount of information that is pouring forth there is an infinite amount of wisdom in everything. This whole entire system very much is a system we could go on and on and on about. But we don't want to flood your consciousness with too much right now.
